## CLARESHOLM LOCAL NEWS

The Review-Advertiser wishes all its readers a Merry Christmas.

Don Cushman is again on the C. P. R. staff at Clareholm.

Clareholm schools closed on Wednesday for the Christmas holidays.

Born, on December 16, to Mr. and Mrs. C. B. Marshall, of Blackie, twin daughters.

Don Cushman is now open for dance engagements, also tuition on saxophone.

The weather is more Christmasy this week. Somewhat colder and enough snow to whiten the ground.

Services will be held in the Church of England on Sunday, 27th December, at 11 a.m. and 7:30 p.m.

B Squadron will hold their dance on Friday, January 8, and promise that it will be even better than before.

On the petition of a number of the merchants, Saturday, December 26, has been proclaimed a civic holiday in Clareholm.

Permission has been granted to all members, ex-members and old soldiers to wear their uniforms at the annual ball of the 2nd Alberta Mounted Rifles on January 8th.

A meeting of the St. Andrew's Society of Clareholm District will be held in the Great War Veterans' rooms, Clareholm, on Saturday evening 2nd January, at 8 o'clock sharp.—G. Shearer, Sec.

The 15 months old daughter of Mr. and Mrs. Oscar Hage died on Thursday last, after a very brief illness. The funeral service was held in Bethel church on Sunday, interment being in Clareholm cemetery.

"The Crimson Eyebrows" will be repeated by the High School Choral Society on Thursday evening, December 31, at the Rex theater. There were many who could not gain admission on December 1st, and this will be their opportunity.

Buster Keaton in "Seven Chances," the year's funniest comedy romance, at the Rex theater on Friday and Saturday nights this week. Screenland's newest star, Milton Sills, in "The Making of O'Malley," on next Monday and Tuesday nights.

Elsie Bash, daughter of Mr. and Mrs. John Bush of Greenbank district, died in the hospital at Calgary on Thursday morning. When she had gone for an operation for gonorrhea, which however could not be performed on account of the condition of her heart.

Miss Isabelle McCorkindale, of Queensland, Australia, is visiting at the home of Mr. and Mrs. James McKinney through the Christmas and New Year's time. Miss McCorkindale is now homeward bound from a two-year tour of the world, being now on her way across Canada to return home by way of the Pacific. During her stay in Canada Miss McCorkindale is giving a number of lectures under the auspices of the Canadian W. C. T. U., and will probably address the local women during her visit to Clareholm. Miss McCorkindale will speak at the evening service in Bethel church on Sunday evening next, December 27.

Tia Juana, the famous winter race track near San Diego, of course attracts horsemen from all over the continent. One who is now there writes that several former Clareholmites are to be seen in and around the bull ring, among them Percy Foreman, who formerly trained horses here, all dressed up and with a good job looking after pole ponies at Coronado Beach. Adolph Noel who assisted J. R. Watt last summer is employed with the well known Drumheller Stable of Wainwright, which has 15 horses at Tia Juana. Leo Merrick, who rode exercise for J. R. Watt in 1924 and still only weighs 85 lbs., is working for "Doc" Davis who raced in the West this summer and has a breeding ranch 12 miles from Tia Juana. Lastly, One-armed Jack Dugre was observed in the paddock looking fit and well.

As next week's publication day falls on New Year's day, it will be necessary to publish The Review-Advertiser one day early. All will please remember that copy intended for next week's issue must be in a full day earlier than usual.

"Bigger and Better" will justly apply to the second annual military ball to be held in the L. O. O. F. Hall on January 8th if present plans carry. The local squadron of the 2nd Alberta Mounted Rifles are enlarging on the plans which made their ball such a success last year. Mack's Melody Makers will furnish the latest and best music, local supporters are furnishing a bigger supper, and a more pretentious, novelty program is planned. Special arrangements for those who wish to sit out or play cards. Everybody welcome.

## Clareholm United Church

A meeting of great interest and importance to all interested in the future of the United Church in Clareholm was held in St. Andrew's church last Monday evening. The members of the session and board of managers of St. Andrew's church met with representatives from the official board of Bethel church to consider the question of the uniting of these two local congregations of the United Church of Canada. The meeting was presided over by James McKinney, and E. H. Mack acted as secretary. All questions relating to the union of these congregations were considered, and the utmost harmony and good will was manifest throughout the discussions. The basis of local union agreed upon is to be submitted to the High River Presbytery at a special meeting in Nanton on Wednesday evening, and later still, at a congregational meeting of the United Church to be arranged for at as early a date as possible.

Sunday, January 3, is to be inaugural day for the local union. It was decided that those services will be held in St. Andrew's church, and, if the accommodation of St. Andrew's is found sufficient, the services for the balance of the winter will be held there. It was generally agreed that the matter of renovating and enlarging Bethel church building as a permanent home of the Clareholm United Church should be taken up at an early date. The officers and teachers of the two Sunday schools will be called together within a few days to formulate recommendations to the congregational meeting for the reorganization of the Sunday school as a united school.

As both St. Andrew's and Bethel congregations have voted favorably on the question of union, and with the fine spirit of good will shown in the meeting of last Monday evening, it is felt that the outlook is most promising and encouraging for the future of the United congregation in Clareholm.

## Attention Curriers!

A meeting will be held on Tuesday, December 30, at 8 p.m. in the Council chambers, for the purpose of electing ships and completing rinks.

Carl J. Braren, Sec.

## Card of Thanks

Mr. and Mrs. Oscar Hage wish to express their sincere thanks to all friends for kindness and sympathy extended during their recent bereavement, also for the many beautiful floral tributes.

## RAILROAD TIME TABLE

D. A. ANDERSON

## Experimenters in Saskatchewan Are Carrying On Good Work Testing New Varieties Of Seed

### Experimenters in Saskatchewan Are Carrying on Good Work

Approximately 500 rural research workers and experimenters are co-operating with the College of Agriculture, Saskatoon, in an effort to improve agricultural conditions by testing out new varieties of crops and new methods of production.

This co-operative effort, consolidated in the Saskatchewan Field Husbandry Association, has two main lines of effort—to increase the supply of the best seed available and to introduce new crops of different varieties and new methods of producing crops.

Hundreds of experiments are tried each year by our members," says Professor Manley Chapman, "as a rule no member tries more than a few experiments in a year, but a few enthusiasts are trying as many as six."

A group of about 50 members are trying out the idea of growing grain in rows in the hope of finding satisfactory later-titled crops which are quite necessary in the development of suitable crop rotations.

"A smaller number are trying winter and oats for a temporary pasture crop, spring wheat, and still another group is trying rye and wheat as a combination crop."

This year over 1,000 members are trying three varieties of corn—Alta Yellow Dent, Northwestern Red Dent and Dakota White Flint.

About 40 members in East Central Saskatchewan are trying timothy for seed production, the seed having been furnished two years ago by the department of agriculture.

Approximately 200 members are trying university seed, the leading varieties in direct comparison with any seed of the same crop which they are growing under like conditions on their own farms."

While not claiming that the association is responsible for the remarkable advances made in crop production in Saskatchewan, Professor Chapman points out that the province has climbed into front rank as a producer of registered seeds, the acreage increasing from 4,000 to approximately 20,000, while the corn acreage has grown from 16,500 to nearly 100,000 acres in seven years.

### France Loses Part Of Reparations

#### Sees Demand As Payment From Germany After Total Loss

France has been stung by insisting that she be delivered her part of her reparations. The German has been working hard and living contented lives on the Lauenburg beach. The climate was right and the flowers delicious in this North German garden. It is France insisted that 20,000 colonies be transferred to the German colonies of those destroyed by the German armies. Though the protest at first transplanted caused loud laughter, the transfer was made. After first inspection of their new home the Germans struck, and then declared a hunger strike. The government has been required each, and now France has only 20,000 empty hives and Germany a receipt for this portion of her reparations bill.

### Gold Mined At Royal Mint

Gold Refining Companies of Ontario to Have Metal Refined at Ottawa Arrangements have been made by the Ontario Mining Association on behalf of the gold mining companies of Ontario for the metal to be refined at the Ottawa branch of the Royal Mint. Returns will be received for this gold in Canadian funds. Since all the machinery and organization necessary for the refining of gold is now in place, the use of the facilities that have hitherto not been employed to the full extent, there will be no extra expense involved in this work.

### Work For Some Person

Lazy Tim and Fred Dick were discussing something they knew little about—work.

"I think," said Lazy Tim, "that if they did any work they would know it would put an end to all these strikes."

"Yes," said Fred Dick, "that'll be the time when everybody'd get to work, only got to press a button and the job's done."

A slow horror dawned in Lazy Tim's eyes. "That won't do," he said emphatically. "Who's a going to press the button?"

"Little Bobby—You won't be able to say that the matches are all laid this time, mamma. I've tried them out on the way home and every one struck."

### Cattle Shipments to Britain

#### Estimated That Value of 1925 Shipments Will Be About \$12,000,000

This year's cattle shipments to Great Britain from Canada will considerably exceed 100,000 head, while the British demand is at present casting off somewhat, the total shipments for 1925 will be a record, the monthly average being well over 10,000. The total value of the cattle exported from Canada to Great Britain will, it is estimated, be about \$12,000,000 for 1925. During the week of November 2, the largest shipment of Canadian steer cattle, numbering 1,000, disembarked at Glasgow, bringing the total imports of that port to approximately 10,000 for the ten months of the year, an increase of more than 15,000 on the corresponding period of last year and 31,000 on the similar period of 1923.

### Canadian Oysters

#### Now Being Sent Across Atlantic to Re-stock British Bays of Europe

Canadian oysters are now being used to restock the oyster beds of Europe. The wars of popularity that has swept the Malpique oysters on to the tables of the epicures of the old countries has resulted in a determined attempt to induce their breeding in the oyster beds of France and England. Two shipments have already been dispatched to England and France, and further consignments are expected shortly.

### Prison Camp Atrocities

Atrocities in treatment of convicts in Georgia prison camps have been discovered. Men are placed in shallow boxes with hands and feet bound and are smothered with blankets to attract flies; others are punished by being suspended for hours by their fingers.

## Sheep Industry Offers Great Possibilities For Development On The Western Plains

### Denmark Boys Lively

#### Poultry From Canada

A shipment of ten record-performing hens and three approved record-performing cockerels is to be made shortly to Denmark by the Record-of-Performance Poultry Breeders' Association of British Columbia, for a price approximately \$400, as one of the results of propaganda work being done for the sale of Canadian poultry breeding stock in foreign countries.

The hens to be supplied in the order are to have records of not less than 250 eggs while the three males are from three hundred egg dams. The British Columbia Association, which has secured the order, is comprised of record-of-performance breeders in the province who have organized themselves into an association for sales purposes. Birds have been shipped from Canada recently to countries in different parts of the globe and the Danish order represents still another forward step in the popularizing of high bred Canadian record birds.

### Garnet Wheat For Seed

#### Ottawa Experimental Farm Has Been Conducting Successful Tests

According to an Ottawa dispatch to a Winnipeg paper the wheat production on the western prairie provinces is to receive a new impetus as the result of experiments carried on in the production of Garnet wheat at the Ottawa experimental farm. Unless the final tests show weakness not likely to be discovered, Garnet wheat is to be made available for seed purposes next spring.

Garnet wheat, which J. H. Newman, Dominion cerealist, has been experimenting with for several years, cuts the growing season down to 100 days, while the period between the sowing and the reaping of Marquis is 110 days.

Experiments carried on in several districts of Western Canada during the past season have proved very successful. Garnet is not rust resistant, but its ability to ripen earlier is a tremendous advantage. It also is said to be of excellent quality for milling purposes.

### Dairying in the West

#### Figures Show How Extensively Western Canada Has Gone Into Mixed Farming

Up to the end of last October, Manitoba had exported, mostly to Great Britain, more creamery butter than was exported by the province for the whole season of 1916. In 1910 the three prairie provinces, Manitoba, Saskatchewan and Alberta, together produced less than 6,000,000 pounds of butter; in 1924 they made over 474,000,000 pounds of creamery butter worth over 15 1/2 million dollars and the total returns for dairy products of all classes was over \$5 million dollars.

It is interesting how extensively Western Canada has gone into mixed farming. The highest price for apples in B.C. Apples sold at auction at Royal Winter Fair.

### High Price For Apples

The highest price ever paid for a box of apples in Toronto and probably in Canada, was made at the Royal Winter Fair, when two boxes from Vernon, B.C., were sold by auction for \$540 each.

Three other boxes sold at \$200 each; three were sold at \$200 each; three for \$150 each and thirteen for \$100 each. The total was \$2,400. The apples were from Sir Adam Beck Memorial Fund at the sanatorium in London, Ont.

### Czech-Slovakians Coming

Canada may expect a considerable influx of Czech-Slovakians next year. According to Edward W. Schmidt, general representative of the Canadian Pacific Railway in France, who has been visiting the west. After dining up the country, Mr. Schmidt reports that Canada is eminently suited to the Czech-Slovakians, who would make good settlers, he reports.

Graphite is found in nearly all the provinces of Canada, and even in the island. The Black Diamond mine, near Calabogie, Ontario is the largest and richest deposit of fake graphite known in America.

### Fragrant

Flagger—Can you recommend this brand of perfume?

Druggist—"Certainly, mine. It is one of our best sellers."

For some time the various governments of Canada and influential livestock organizations have been endeavoring to develop the sheep industry in Canada, both by stimulating interest in the industry among the stock raisers and by bringing to the attention of prospective settlers elsewhere the opportunities existing for such development in the Dominion. It has been claimed, on good authority, that sheep raising holds better prospects at the present time than possibly any branch of agriculture.

One province at least would seem to have benefited materially by this counsel, and the sheep industry of Alberta is reported as being in a very fine condition. An increasing number of Alberta farmers are adding sheep to their activities, and the Alberta wool clip, it is anticipated, will show great improvement within the next few years. Some 100 Rambouillet rams were imported last fall from the United States and a large number of Rambouillet ewes (including one band of 1,200 head). According to customs officials, some 14,500 head of sheep were brought into Alberta from Montana and other states during the ninety day duty-free period. According to the spring estimate of the Canadian Co-operative Wool Growers' Association, there were at least 175,000 head of sheep to be shorn in Southern Alberta, with an average of six pounds per fleece, meaning a yield of approximately 1,000,000 pounds of range wool.

The secretary of the Canadian Wool Manufacturers' Association, who recently, said: "Wool and mutton growing in Canada have proportionately the most serious economic development than any other farm products, while such a development would be of tremendous benefit to agriculturists and the nation as a whole. It is beginning to be realized that Canada has all the characteristics for a great wool and mutton industry. The climate is favorable, the physical properties are suitable, the droughts and diseases which decimate flocks in other countries are absent, and world conditions are right for expansion in Canada."

Col. Robert McEwen, president of the Canadian Co-operative Wool Growers, and a consistent winner of international honors for his sheep, has to say: "Taking Canada as a whole it has been proved that climatic conditions are favorable for sheep raising. No devastating disease has visited our flocks. Yet today we find ourselves against serious economic problems of consuming more wool than we are producing, and for a comparatively new and fertile agricultural country like Canada to be in such a state of deficient supply of raw material for such an essential as clothing should be considered, the serious consideration of us all."

### Canadian Horses For Scotland

#### Developing Good Market For Draft Horses of the Better Class

Canada is developing a splendid market in Scotland for draft horses of the better class, according to word received from the Canadian trade commission in Glasgow. Twenty horses were recently dispatched from Scotland, Ont., to Glasgow, and another batch of twenty Percherons were lately sent forward to the same Scotch importing firm. Further shipments will consist of Clydesdales for carrier firms.

### "Thanks, Call Again"

When the ship arrived at Calcutta last week, for India, recently, he took with him an enormous quantity of purchases, including a \$25,000 automobile, a motor launch, and a large number of hundred suits of clothes. London might well hang up a "Welcome" shingle when he arrives. "Thanks, call again," when he goes.

### Horse Meat Eaten in France

There are reports from Calcutta for the markets in France, where the meat is considered wholesome. The animals killed are not worn out, but are disposed of because of bad temper and habits or because they are no longer needed. Of 55,000 horses slaughtered in France in 1923 only one had tuberculosis.

### Missionary Bombs Perilous

Thirteen specimens of a parasite that has caused a great death toll in China, were swallowed by Dr. C. H. Brown, a medical missionary, in order that he might bring it to John Hopkins for study.

### The fathers of more than 11 per cent of the persons listed in Who's Who were clergymen.

## Here and There

Major-General Sir Fabian Ware, vice-chairman of the Imperial War Graves Commission, who has been visiting in Canada during October, has been recalled to England much earlier than he expected. Prior to sailing on the Canadian Pacific liner, Montclare, from Montreal, he expressed the hope that he would be able to come to Canada again next spring so that he could give Canadians in the West some idea of what the Imperial Commission is doing in caring for the graves of western youths who perished during the war.

Robert L. Rice, Jr., of Boston, and J. V. Cole, of Harvard, took big chances when they attempted to travel by canoe from Rouyn to Angliers at the end of October. Although they started in beautiful Indian summer weather they ran within a few hours into a bad storm which filled their canoe with half melted snow and almost froze them into unconsciousness. Fortunately they arrived in the nick of time at a fire-ranger's hut where they stayed a few days until the storm abated. They were prospecting in the neighborhood and were none the worse for their perilous trip when they finally reached Montreal.

Bob Shawkey, New York Yankees veteran pitcher, who organized the party of major league baseball players now hunting big game in New Brunswick, shot a mouse with antlers spreading 56 inches and having 28 points, according to word received at Fredericton, N.B. Shawkey shot the mouse the first day the party spent in the woods. This information is conveyed by another party of hunters who passed the camp of the ball players at Nepisiquit Lakes. In the group are some of the best known players in the American League, Eddie Collins, Babe Ruth and Muddy Ruel being among them.

The romance of a young couple culminated in New York City recently when Dorothy Holmes O'Bryan, daughter of Major-General and Mrs. John F. O'Bryan, of New York, married Darwin Curtis, of Chicago. The couple met for the first time a year ago on board the Canadian Pacific liner Empress of France, which was then making a tour of the world. It is feared they had no eyes for the world's news which were unrolled before them on the tour, since it is stated they fell in love at first sight and could only see each other. The marriage was performed by the Rev. Father Francis P. Duffy, chaplain of the "Fighting Sixty-ninth," a regiment commanded by the bride's father during the war.

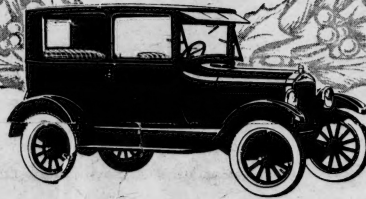

Good reading for Canadian Pacific shareholders is furnished in the September statement of gross earnings, working expenses and net profits. It has been the most favorable month for the company in a long time. The gross earnings were \$18,000,000, the greatest shown in any month since October, 1924. Operating expenses were \$12,041,452 and the difference between the two, the net profits \$5,958,548, an increase of \$1,710,978 over the corresponding month of last year. Net earnings for the first three quarters of this year, ending September 30th, is \$1,100,000 greater than the 1924 figures, despite a decrease in gross earnings of over four and a half million dollars. This was made possible by the company's policy of rigid economy.

To bring the Arctic within the scope of tourist traffic is the object of the Marquis M. N. de la Rivière, winter sports director at Lake Placid, who is organizing pack horse trips of thirty days' duration next year from the Canadian Pacific Rockies as far north as the Columbia Ice Fields within the Arctic Circle. "We are going to swim our horses and outfit across the Snakehead River and camp near the sources of the Athabasca which empties into Great Slave Lake and thence into the Arctic," the Marquis asserts. The first of these trips is scheduled between June 20 and July 27 next year.

## An Exchange Of Farmers

Great Britain Sending One Hundred to Tour South Africa

Great Britain is making an exchange of farmers with South Africa. Last summer a delegation of agriculturists travelled from Cape Town to England and studied methods used there. On their return they published a souvenir of their tour, sending a copy to the British governments, which in turn "graciously declined to accept," at the same time expressing the hope that farmers of England would return the visit.

Arrangements to this end have now been completed and the South African National Farmers Union is already preparing to welcome fifty of the soil from Great Britain and the Irish Free State. The British minister of agriculture has associated himself with the scheme, and a tour of the United Kingdom is planned. The excursion will be limited to the actual farmers. South Africa's interest in the visitors was that comparatively sparse population has accomplished in agricultural development of the country and at the same time demonstrate the vast natural resources of the land. The visiting farmers will be given special trains to many parts of South Africa, the tour covering more than 8,000 miles. There will be a stop at Victoria Falls on the Zambezi, one of the great waterfalls of the world, and opportunities will be given to see something of Rhodesia and the Orange Free State. It has been arranged for the party to leave Southampton early in February and return about the last of April, the time coinciding with the most active farming season.

## Wild Animals Lose Fear of Man

Defenceless of Canada's National Parks Have Become Quite Tame

As the summer years round of tourists bring new experiences and wonderment and surprise at the rapidity with which the wild animals in the Canadian National Parks are losing their fear of man. Parks' officials, who administer wild life protective measures, have watched this condition develop and to them it was to be expected, but to the tourist new to the parks the holding up of one's car on a park highway by a head of moose or Rocky Mountain sheep is a novel experience.

Visitors to Rocky Mountain park in Alberta are always sure to have close views of mountain sheep and other wild animals at different points on the highways, and before are frequent visitors to the outdoors of most of the towns in the parks. In the past year or two, all, among the most wary of animals, have been reported to have made their appearance on the golf links at Banff while play was in progress. In the early part of October of this year about fifteen elk trotted out on the fairway of the 13th hole, on their way from the Bow River to the upland forests. These animals of animal ferocity are not confined to Rocky Mountain parks. In Jasper Park, on the west coast of British Columbia, in July of this year, two young black bears interrupted the golf marshals game by their appearance on the links.

The growth in numbers of wild animals in the parks and the ease with which they may be encountered and photographed is year by year becoming a greater attraction to tourists.

## Girl Takes Public Office

Was Popular Choice For Mayor of Dunstable, England

Miss Lucy Dalby has been elected mayor of Dunstable, Eng. Her father cast the only vote against her. He has been mayor for one year and the daughter performed all the duties of the job, but he opposed her taking office on her own account.

Asked if he wanted the job again himself, he replied:

"Oh, no. I have had enough and would not be mayor again on any account, and I oppose my daughter's election out of sympathy for her."

## Lions Annoy School Children

Lions, having become numerous in Northern Transvaal, are causing much trouble for the farmers. The party school have been taken to the lions to school have been frightened by the beasts and special protective measures have been taken. The party lions have killed within the last three months in one district, where they had killed cattle heads and damaged the crops.

## Canadian Abattoirs

Canadian abattoirs which is the chrysalis or serpentine variety, is of the finest quality, and on account of its softness, pliability and tensile strength, it is a great medium for all kinds of asbestos products, but particularly for asbestos textiles.

## Where Silence Is Compulsory

No Noise Allowed During Hours in East India

The British hour in the tropical East Indies is sacred. Woe to him who holds it. Everywhere, save in the cities, it is in "My Trip Around the World," notices are put up on the walls requesting people not to talk between the hours of two and four, saying that "dogs will not be permitted to bark for children to cry." How do you suppose they really mean to say "to obey these notices?" If you speak above a whisper, a loud, stilted hiss, like a snail's, runs the rounds of the verandah. Once I heard a baby give one wall, and no more. It was cut short.

They tell of the horrible fate that befell a rash young American, who foolishly imagined that he could violate a holy institution and get away with it. It seems that this bold youth had a typewriter, and he undertook to pick off some letters during the sacred hours. The management sent him a polite message requesting him to desist and telling him that it was not permitted to make any noise between two and four o'clock. The young American replied that he was sorry, but the mail box was leaving and he had to go. He left a business letter that he must get off. He picked up the typewriter. That was all. The clerk, followed by three or four servants, arrived on the scene, and before he knew what had happened of this typewriter and his baggage, were out in the street together, and the door behind him was slammed. He heard a baby give one of a hundred when it's the only one in several hundred miles.

## Buckingham Palace Reaches Centenary

Queen Victoria Was First Sovereign To Occupy It

This year marks the centenary of Buckingham Palace as it stands today. In 1825, George IV, decided to convert the residence then known as Buckingham House, into a palace. The King died before it was completed, and not until 1837—when Queen Victoria went to live there—was it occupied by a sovereign. William IV, it seems, had no liking for the new palace and preferred to live elsewhere. Improvements have been made from time to time, and during the reign of King Edward there were numerous and rather costly alterations. The late Queen and Prince Consort entertained lavishly in this respect the Queen showed her taste, and most opposite to her grand mother, Queen Charlotte. At one time the palace entrance and exits were guarded in a very strict manner. A boy named James came to have entered the private apartments and to have listened to a private conversation between the Queen and her hand. This prank on the part of "Jim Jones," as he was nicknamed, resulted in the more stringent protection of all entrances.

## Would Boost Lumber Trade

To Seek Prairie Markets for British Columbia Lumber

An extensive advertising and sales campaign for British Columbia lumber has been launched by the British Columbia Lumber Association. The plan is to send a representative to the prairie provinces in the proposal of lumber dealers in Alberta, Saskatchewan and Manitoba. It was announced by A. K. Godfrey, prominent retail lumber man of Winnipeg, speaking at Vancouver. "The time is ripe for an aggressive sales campaign, and the retail dealer realizes it," the speaker said.

Mr. Godfrey's views were endorsed by Walter Thorne, a retail lumber man of Moose Jaw, Sask., and by Theodore Sparks, of Winnipeg.

## Canadians Are Returning

Figures Show That Large Number Are Returning to Homeland From U.S.

In the first nine days of October, 72 former Canadians, who have lived in the United States for more than six months, returned to Canada, according to the department of immigration and customs. These figures are based on 479 actual immigrants came to Canada from the republic. That the returning Canadians were people of substance is indicated by the fact that in one week those returning through government offices in the United States brought back with them \$198,200.

## Sure Sign of Trouble

How to read the future: If your small gas escaping and look for the smell with a lighted match. It is probable that you are entering on a long journey, if your wife's name is Ethel, and you assume "Edith" in your sleep. It is a sign that you are going to have domestic trouble."

Another good warning of bad prospects is to be wrecked or

## Solve Mysteries Of World War

Will Uncovering Details of Soldiers Listed As "Missing"

Seven years have passed since the World War was signed, but the blood-stained pages of France still cover the mystery of thousands of soldiers carried on the rolls of the French ministry of war as "missing in action."

A large part of the old battle lines have been reclaimed and the field upon which men fought for four years has been returned to crops. In the process, the farmers of France have uncovered thousands of miles of trenches, would tens of thousands of miles of rusted and torn barbed wire, filled in shell craters and removed with such unexplored regions of war, which unfortunately, only too frequently exploded in the hands of these brave peasants and add more names to the death toll of the war.

These farmers also have succeeded in finding the bodies of thousands of German soldiers, who fell in conflict and were covered by a scattering of their comrades or by an exploding shell or by land, scoured, craved by instinct into a copse where death overtook them and they remained hidden from the squads of German battlefields after each engagement.

## Popular Spot In Scotland

Every Year Many Thousands Visit Birthplace of Robert Burns

During the year ended September 30, the number of visitors was 98,214, being 125,767 less than in the previous year. At the monument 52,246 people passed through the turnstile, an increase of 4,832 as compared with the previous year. The Glasgow fair week was the busiest of the year, the number of visitors to the monument for the week reaching 7,316.

Mr. Van Pesto—"When would be a good week for us to come and visit you and bring the children to the Burns-Suffering Victim."—"About Dec. 5."

"Sorry, but we'll be out of the state during the month of December."

"So will we."

## "Little Havens of Perfect Happiness"

Had For Gray Hair

The young man with the fluffed hair very proud of himself. It is natural that he should be so, for he had been promoted to the position of chief traveller for a firm of wholesale druggists and, further, he had the use of a car.

For the benefit of this story it is essential to note that the young traveller is an honest and truthful young man. His first business call took place in a drug store in a watering place. He already had a lengthy list of goods on order when the white haired druggist inquired:

"Has your firm anything for gray hair?"

"No, I'm afraid not," came the astounding reply. "Nothing but the greatest respect," Boston Herald.

## Remains Of Extinct Mammoth

Wonderful Exhibit In National Museum at Washington

A small table and panel on exhibition in the National Museum at Washington, constitute one of the most wonderful exhibits. They contain some of the hair, musculature, fat, blood and stomach contents of a giant mammoth which died 50,000 years before the birth of Christ. A few years ago a party of Russian explorers dug into an ice bank on the Beresovka River in Siberia and there unearthed the remains of an extinct animal in a remarkable state of preservation. The skin was so perfect that it was easily removed. Some of the hair measured 30 inches. Analysis of the stomach contents showed that the mammoth ate the same types that grow in Northern Siberia today.

## Greatest Seal On Farm

There is one thing about a dairy cow. If you have a mine and you can't get the ore, the productive value of the mine is gone. But a dairy cow may return you \$125 worth of products each year, and repeat the next year.

It is also the fertility of the land all the time. The dairy cow is the mother of all husbandry. Treat her right and she is the greatest asset on the farm.—Amersburg Echo.

## Use Eggs As Currency

Eggs are being used as currency in the Kora Kala district of Arizona. The eggs are accepted for the "face value," an equivalent to one ruble, or fifty cents in Canadian currency. If any of the eggs prove to be infertile they are returned as "lighted ten."

## Silver Foxes Eat Fowl Fowl

Guards Lose Mysterious Disappearance Of Twelve Valuable Chickens

Near \$100 worth of silver foxes, transported to Europe for breeding and exhibition purposes, devoured 1740 worth of fowl level on the way over was told by the crew of the United States liner George Washington, which returned to New York from Bremen.

About 200 chickens, each valued at \$5, and the foxes had been assigned to the same light compartment. Guards travelling with them found that each time they counted the fowl one less was accounted for. At length a heavier guard was established and it was discovered that two of the exportly coated rewards, each worth \$1,200, had broken through their cages into the coops and had feasted on twelve chickens.

## Ancient Monarch of the Forest

Cedar Tree, 2,300 Years Old, in the State of Washington

Washington's oldest standing tree, a cedar tree 2,300 years of age, has been ascertained by the generosity of natural lovers for this tree stands 200 feet high, 18 feet in circumference and 18.4 feet in diameter.

The Washington Natural Parks Association raised \$2,000 by popular subscription to buy the monarch, together with 30 of its companions, which stand 25 miles from Seattle. The tree acquired by the grove will be not added as a state park.

## The Judge Knew Him

In a Maine town the champion local liar was brought before the justice of the peace for violating a law. It was a pretty plain case, and, on the advice of his lawyer, the prisoner decided not to appear about it.

"I plead guilty, your honor," he said.

"Hear," said the judge. "I guess I'll have to have more evidence before I can sentence you."

During the first nine months of the current year, there was \$116,577,400 worth of herring taken from the fisheries of Canada. As caught and landed the fish were valued at \$11,315,200. Among the many uses for the herring is that of bait for which 121,374 barrels were thus consumed.

## Nothing But Respect

Only Thing Drug Traveller Knew Firm Had For Gray Hair

The young man with the fluffed hair very proud of himself. It is natural that he should be so, for he had been promoted to the position of chief traveller for a firm of wholesale druggists and, further, he had the use of a car.

For the benefit of this story it is essential to note that the young traveller is an honest and truthful young man. His first business call took place in a drug store in a watering place. He already had a lengthy list of goods on order when the white haired druggist inquired:

"Has your firm anything for gray hair?"

"No, I'm afraid not," came the astounding reply. "Nothing but the greatest respect," Boston Herald.

Eggs are being used as currency in the Kora Kala district of Arizona. The eggs are accepted for the "face value," an equivalent to one ruble, or fifty cents in Canadian currency. If any of the eggs prove to be infertile they are returned as "lighted ten."

## Where Saul and David Fought

Excavations By Palestine Expedition Uncover Remains of Battle Grounds

Excavations of forts and battle grounds where Saul and David fought the Philistines are described by Alan H. Rowe, field director of the Palestine expedition of the University Museum of Philadelphia in a report which was made public by Dr. George Byron Dodge, director of the museum.

Fortresses, successively occupied by the Philistines, Philistines and Israelites have been unearthed on the top of the hill of Beth Shan near the Jordan, lying bare the wall on which the Philistines hung the body of Saul. The interior of the wall is marked by an ancient configuration believed to be made about 1,000 B.C., as part of the revenue for the death of Saul which was wreaked on the Philistines by David after he conquered it. A quantity of baked clay objects belonging to the cult of Ashtoreth have been collected among the remains of the building, which is apparently the temple of Ashtoreth, where, according to I. Samuel, the armor of King Saul was hung.

## Gambling With Ice Cream

Spanish Street Vendors Give Chances To Play For Free Treat

In our country ice cream is a temptation by itself, but in Spain there is something more to the temptation to gamble. It is bought from a street vendor. Out of the scone past that holds the cream is a small wooden plate where which is placed a revolving stick. Round the edges of the plate, which is colorfully decorated, are numbers from ten to one hundred are placed. The intending purchaser pays the vendor a penny, which entitles him to one twist of the stick. If the pointer indicates a number higher than that made by the stallholder, the winner is entitled to an ice cream free of charge and another twist of the stick. With luck, and provided the game is played fairly, one can have a succession of losses for the original penny. If the pointer wins in the first instance the penny is lost and the customer receives nothing. These are some of the reasons of interest to gamblers, who spend most of their spare cash in attempts to defeat the ice cream man.

## Exercise That Is Cheap

Walking Has Given Place To Expensive Gymnasium Equipment

Are not Canadians and Americans becoming the latest people on the face of the earth to believe that across the sea are real walkers. Clerk walk to and from school, two or three miles, and away from work, and from their work, on Saturday afternoons and Sundays they walk to and from the city, and they walk to their health. And nobody thinks of worth while writing to the newspapers and asking important questions. They walk they take from London to Brighton or from Manchester to Blackpool, a distance of fifty miles or so. Here, our young folk simply must go by motor or ride a wheel to and from any place over a mile away (or even less), and they are not only walking, but they are doing some necessary exercise, thousands of dollars are spent on gymnasiums, swimming pools, tennis grounds, croquet grounds, etc., in schools, clubs and institutions. There is enormous waste in duplication of such things, and the money which could be so well without if hiking clubs were substituted for sports clubs.

## New Mastered English

William the Conqueror Could Not Understand English of Subjects

Did you know that William the Conqueror never learned to speak the language of his English subjects? Although he ruled England for more than twenty years after the battle of Hastings and made "many laws and gave important commands," he never learned to speak the English of his subjects. William I never mastered the Saxon English.

At one time he decided to study the language of his subjects so that he would be better able to administer justice in person and without the help of an interpreter; but the old English was no easy language to master, and William was always busy quelling rebellions and trying to keep order in his newly-conquered and unruly realm. Probably, too, he was no natural linguist, and the Norman nobles about him were not so great as it might have been. At any rate, we know that he soon gave up the attempt to learn the new language and continued to speak the Archais French of his Norman birthplace till the day of his death.

## Canadian Bond Sales

Canadian bond sales during the week ended October 24 amounted to \$2,547,000, the largest total for the year to date to \$437,857,136, classified as follows: Government, \$252,238,232; municipalities, \$41,521,774; real property, \$101,522,000; and railroad, \$141,762,897. These bonds were also sold in the following: United States, \$200,123,862; Great Britain, \$209,745,000; and Great Britain, \$27,575,333.

## Cattle Shipments Increasing

With the record for export of livestock from the province already broken, officials of the provincial branch of agriculture, livestock branch, anticipate that the 100,000 mark will be reached by the end of the year.

During the first five months of the year, 92,500 head have been exported, compared with 70,651 head for the period last year and 50,757 for 1922.

## WORLD HAPPENINGS BRIEFLY TOLD

Turkish telephone operators are conducting a strike, following refusal of demands for wage increases.

A gas mask producing its own oxygen has been invented by H. C. Carter, of Victoria, Australia. This has not yet been tested, at least, the proponent of the mask for divers and sailors.

The world's largest saxophone recently made its appearance in London in a musical display. It is 22 feet high and the bell is four feet in diameter.

Basalt, a little town in the mountains of Colorado, is so prosperous, it has asked the state public utilities commission permission to provide water to its residents free of charge.

During the demolition of a very old house in a village near Bergamo, Italy, a human skull filled with antique gold and silver coins was found in a hollow wall.

Commercial travelers in some parts of California are being asked to furnish orders to their headquarters. Homing pigeons are carried by the travelers and released when needed.

Provision for the upkeep of his large string of horses until their natural death and the erection then of stones over their graves, is made in the will of the late David Shaw, millionaire horse breeder of Cleveland.

Communism can gain no footing in Britain if good homes, food and opportunity to education are provided. declares Miss Irene Ward, political student, in an address before the Canadian Club at Toronto.

A resolution, recommending the state of organized labor in the United States in favor of the principles of the world court, was passed by the executive of the American Federation of Labor at Washington.

Canada has decided to take part in the British Industries Fair which is to be held in London and Birmingham in February next. The Canadian chamber of commerce in London, by arrangement with the high commissioner for Canada, is organizing the Canadian exhibit at the London section.

Stella Smith, a Havasupai Indian, Grand Canyon, Arizona, has been thrown from his horse for the first time in one hundred years. The previous occasion was when he was four years old. He is now 104. This time, however, he was critically injured.

## Sensational Ore Find in B.C.

### Rich Strike of Ore Discovered by Lucky Prospector

A dispatch from Terrace, B.C., states that samples of ore are reaching there from the latest "big discovery near Vanarsdale, a station on the Canadian National Railway a few hours ride from Terrace, are of a sensational character and have created much excitement among mining men. Assays of the ore run \$75 to \$250 a ton. But of equal interest is the size of the veins and the great amount of mineral they carry, nearly all being in the form of exceedingly rich streaks or pockets. The veins on the Silver River claim, which was located by the original discoverer, William Van Meter, are of such size as to justify claims for the right to adjoining claims and arrangements are being made by Van Meter and the George Little syndicate, of Terrace, to drive tunnels on their respective properties. The location is only two and a half miles from the Canadian National Railway and is ideally located for development work.

## Not Thrilled By Life

Eskimos Apparently Not Impressed by Sights in Montreal

After seeing all the sights of a modern city the four Eskimo men who arrived in Montreal last night, were not particularly impressed by the sights of the city.

The Eskimos went from Montreal to Paines, Ontario, where they will stay for the winter. It will be impossible to send the boat north before the spring, so the natives are being kept at Paines until an opportunity occurs in the spring to take them back to their home at Baker Lake.

An important piece of Dominion-wide legislation is compulsory control of railway lines throughout the forested areas of the Dominion for the prevention of fire caused by locomotives and railway operation generally.

Former (using telephone on the first time)—Send me a bunch of ants. Voice Over the Wire—Who are they for? Former—Don't be funny with me, my lad. They are for my horse.

W. N. 12, 1925

## Curb Red Activities

Communist in Western Canada To Be Closely Watched From Ottawa  
Activities of Communists in Western Canada are being closely watched from Ottawa. The Communist publications in Winnipeg, returned to in a Winnipeg newspaper, are being scrutinized and action will not doubt be taken where the law is traversed by such publications. The chief interest of the Dominion Government in Communist activity hitherto has lain in the efforts made to penetrate organized labor, and these efforts have not so far met with any great success, it is pointed out here.

The education of young children in the tenets of Socialism is undoubtedly going on, it is said. The recent deportation of a whole family from Winnipeg, back to England resulting from the seditious speeches made by a young boy at a May Day demonstration. This action was taken by the immigration department, which along with the labor department and the Royal Canadian Mounted Police, are interested in the Communist movement in Canada.

## Britain's Offer Is Generous

Interests of Egypt Would Be Protected In Control of Nile

Within the period of a generation one of the longest rivers in the world, from its remotest to the sea, should be completely harnessed to the service of man. Regulated, controlled, and disciplined, the achievement, said by the British, is not only a great feat of engineering but also a great feat of statesmanship. The plan is to build a dam at Assuan, in the Sudan, and the creation of a semi-independent state under their own direction. She demands that the water requirements of the Sudan and thus its entire development, should be subordinated to her own needs. Great Britain offers a defensive alliance, a partnership in the administration of the Sudan, and the placing of the control of the Nile in the hands of a neutral and international body. In the opinion of the many thousands of foreigners living in Egypt, who are in a position to form an unprejudiced judgment, England's offer is generous in the extreme.—T. H. Barron in the Nineteenth Century.

## Vagrant Children in Russia

Big Cities Overrun By Homeless, Starving Waifs

Vagrant children in Russia number more than 200,000, the commissar of education has found. He characterized it as a situation menacing the welfare of the country and according to him has organized a new system of factory schools for homeless children. The big centers, like Moscow, Leningrad, Kharkov, and others are overrun by homeless waifs who sleep on the sidewalks, half-naked and half-starved. The "Communist Party" for vagrant children, to which the government contributed several million rubles and to which another few millions have been added by voluntary contributions, has been found insufficient.

## New Fire Fighting Plane For Manitoba

If Machine Is Successful Others May Be Constructed

A scrapscaper's new engine flying boat, which it is said will revolutionize the aerial fire fighting methods used by the government protective patrols, is being tested at the Dominion Government airbase at South Marsh, near Ottawa. If satisfactory, it will be sent to Manitoba, where it will take on fire protective duties one of the most important forest areas. Although practically the same size as an ordinary machine, and with two engines on either side of the body of the wing of only 200 horsepower, the machine is said to be capable of between 50 and 100 miles an hour. If this machine is successful others of the same type may be constructed for fire fighting purposes.

## Ontario's Hay Crop

Ontario's crop of hay this year is of exceptionally high quality and is valued at \$1,200,000,000 of new hay have been moved through the co-operative system. The product of Ontario's agriculture. The product of Ontario's agriculture. The product of Ontario's agriculture.

## Alberta Made Sugar

Ontario 25th year Alberta made sugar from the factory of Hayman, Alberta, on the market. The product of Alberta beet is said to be going beyond to that made in California and with the extension of growing operations in Southern Alberta, it is expected to extend the market.

## CLIPSE FASHIONS

The Fashionable Flare

Flare will fashion this skirt with the front of the skirt flaring in the middle and the sides very simple and very close are the lines of this youthful skirt, which may be worn successfully for any day-time dress. The plain back extends over the shoulders at the front and the skirt is closed by a simple button. Small, round buttons fasten the loops of the skirt at the waist. The lower section of the full skirt is finished with a decorative trim, a narrower width being used for the collar. The skirt is made in the simple dress of No. 1222, which is in size 18, 20, and 22. It is made in 34, 36 and 38 inch bust. Size 18 years (38 bust) requires 4 1/2 yards of 36 inch, 4 1/2 yards of 34 inch material. Price 20 cents.

## How To Order Patterns

Address—Winnipeg Newspaper Union, 1222 McDermott Ave., Winnipeg

Pattern No. .... Size .....

Name .....

Town .....

Province .....

Send 20c coin or stamps (wrap coin carefully)

## Sweden Had Unusual Summer

Average Temperature Was High With An Abundant Rainfall

The official daily weather records, which in Sweden go back two hundred years, reveal for the past season a number of astonishing facts. On several occasions this summer Sweden has been warmer than Egypt, and the average temperature for July was higher in Stockholm than in Paris. The rainfall was also three times more abundant than usual and yet the number of hours with sunshine came close to the record held by 1914. The Swedish crop has been remarkably abundant this year and the weather conditions for the harvest favorable.

## Alberta Good Roads

Ambitious Road Building Programme Will Be Completed in 1925

By 1927 the Alberta Government hopes to complete its \$5,000,000 road building programme, to Hon. A. A. Ross, minister of public works, announced. By that time the province will have earned a \$1,500,000 fund from the Federal Government. Sub-grades are being constructed on 2,500 miles of highway. Six hundred miles of main highways are now being graded. The main highways in Alberta, leading east, west, north and south, will be gravelled.

## Many Autos Registered

More than 22,000 motor cars are operating in Alberta this year, compared with something over 47,000 in 1921. The total receipts from car license up to the middle of September this year were \$121,000, compared with \$415,000 for the entire year of 1921.

He—But don't you cook much more for dinner than we do, darling? She—Of course, silly! If I didn't, how could I economize by making leftover dishes?

## Powerful Rays From Cosmic Space

Graduate Of Saskatchewan University Is Associated With Great Scientific Discoveries

Ray more penetrating and powerful than anything heretofore known or imagined on earth have been discovered, studied and measured by Dr. Robert A. Millikan, of the California Institute of Technology, Pasadena, California, and his associates, with whom has been associated in the last most fruitful years of his research work G. Harvey Cameron, son of Principal G. W. Cameron, of Nutana College Institute, Saskatoon, and a gold medalist of the University of Saskatchewan.

Announcement of the remarkable discoveries made by the two scientists was made by Dr. Millikan recently at a meeting of the National Academy of Science at Madison, Wis. He told of invisible messengers from the great cosmic spaces beyond the ken of man, rays approximately 100 times more penetrating than the most powerful X-rays produced in hospitals and laboratories.

Mr. Cameron, whose share in the discovery brings him into world prominence as a scientist, was graduated with honors from the University of Saskatchewan with a Bachelor of Science degree in 1921. On the recommendation of Dean G. H. Log and Dr. L. E. Harrison, Mr. Cameron was given a teaching fellowship in the California Institute immediately after graduation.

## Interesting Secret Revealed

How British Admiralty Obtained Possession of German Signal Codes

An interesting piece of secret history, which explains how the German naval signal codes came into the hands of the British admiralty, has just been revealed in London. When the German cruiser *Magdeburg* struck a mine near the island of Odenoshoff, off the Estonian coast, the crew abandoned the vessel and fled. But it was noted by some Russians that one of the German officers jumped overboard.

This aroused the Russians' curiosity, the spot was noted, and a diver was sent down. He recovered the body of the officer, and it was then found that the latter had secured in his person a number of secret German naval codes.

Many of these codes, was supplied to the British admiralty; but the Germans, unaware that they had fallen into hostile hands, continued to use them. It is stated that the possession of these German codes was of considerable value to the British fleet during the battle of Jutland.

## Prince Has To Make Report

Always Talks With Premier Before And After Empire Tour

It has always been the practice of the Prince of Wales before starting on an empire tour to have a talk with the premier of the day and to report to him, as it were, on his return. This was the character of the interview the Prince had with Mr. Baldwin at York House, when no doubt he had much of interest to impart to the premier. The prince is still another "report" to make. It is the lord mayor and citizens of London, and the occasion for it will be a function that the present king, when Prince of Wales, made his famous "Wake-up, England" speech. His son may have no such stirring address, but an address of unusual interest is expected.—Liverpool Weekly Post.

## Created Canadian Record

Pen of White Leghorns at Langley, B.C. Wins Egg-Laying Contest

With a grand total of 2,653 eggs, the pen of White Leghorns owned by J. H. Mufford, Langley, has won the fifth egg-laying contest with a cash prize of \$100. The pen has not only created a Canadian record but probably a world record. The pen was owned by Mr. W. H. Hicks, superintendent of the station. The hen of the winning pen of ten birds laid an average of 265 eggs each.

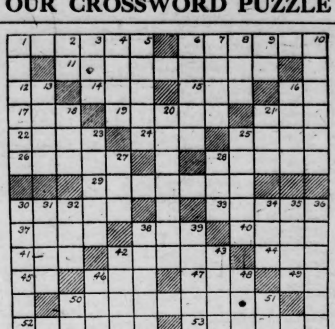

## Equine Casualties in the War

The horse and mule casualties in the western front during the World War, distinct from during the war, is placed at 128,888 killed and 1,000,000 wounded. The official figures of the veterinary services. Of this number, 178 were killed and 1,568 injured by gas and 51,208 were killed and 67,532 wounded by shrapnel.

## Profitable Whaling Industry

British Columbia whaling industry annually produces about 400 tons of whale bone meal and 500 tons of meat and blood for fertilizing purposes. A small quantity of this whale oil is utilized in the province and the remainder is exported, principally to the United States.

## OUR CROSSWORD PUZZLE

## Horizontal

- 1—One who captures.
- 2—People who are indifferent to pleasure or pain.
- 3—Purchasers of securities.
- 4—Narrow.
- 5—Referring to dry.
- 6—Dead.
- 7—Revolving door (pl.).
- 8—Kind of match (pl.).
- 9—Four feet.
- 10—Piercing to ships.
- 11—Jumbled type.
- 12—Winch.
- 13—Kind of love.
- 14—An astronaut.
- 15—Water portion of certain animal fluids.
- 16—Solid bodies of land.
- 17—Trench merchant vessels.
- 18—Cleric.
- 19—Bride.
- 20—Perceive.
- 21—Mohammedan prince.
- 22—Richen utensil.
- 23—Kind of duck.
- 24—Humiliated.
- 25—Was concerned.
- 26—Bond.
- 27—Pressman.
- 28—Referring to us.
- 29—Negative.
- 30—Kind of deer (pl.).
- 31—Kind of match (pl.).
- 32—Four feet.
- 33—Gait at clear profit.
- 34—Nix.
- 35—High explosive.
- 36—Cooking apparatus.
- 37—Kind of wall.
- 38—Long, narrow piece of land.
- 39—Impudent.
- 40—Cleric.
- 41—Bride.
- 42—Perceive.
- 43—Mohammedan prince.
- 44—Richen utensil.
- 45—Kind of duck.
- 46—Humiliated.
- 47—Was concerned.
- 48—Bond.
- 49—Pressman.
- 50—Referring to us.
- 51—Negative.
- 52—Kind of deer (pl.).
- 53—Kind of match (pl.).
- 54—Four feet.
- 55—Gait at clear profit.
- 56—Nix.
- 57—High explosive.
- 58—Cooking apparatus.
- 59—Kind of wall.
- 60—Long, narrow piece of land.
- 61—Impudent.
- 62—Cleric.
- 63—Bride.
- 64—Perceive.

## Faced Ordeal At Sea

Father and Daughter Shipwrecked

Miss Tom Yacht  
William S. Smith and his 19-year-old daughter reached Bristol with a thrilling story of their attempt to sail to New Zealand in a 5-ton yacht named *Morgan*.  
Everything went well until September 8, said Mr. Smith, when, after five days, they struck a succession of heavy gales.

"Raked in and battered down tight for three days at a time, we were utterly helpless and at the mercy of the storm."

In collision with a French trawler the *Morgan's* bowsprit was swept away, and later the two occupants of the tiny craft saw a steamer founder less than 100 yards away.

The sextant, chart, chronometer and almost everything movable was washed away. The end of their adventure came when the *Morgan* ran on to a sandbank outside Carmarthen Harbor.

Both father and daughter declare that they are willing to repeat the attempt.

## Unemployed Insurance

Committee of Twelve Is Appointed by British Government

Twelve members of the highest standing have been chosen by the department of labor in Britain to make an exhaustive inquiry into the system of unemployment insurance, commonly known as dole, and to report its effect upon the morale of working people. Under the terms of reference the committee will be able to make a most thorough survey of a subject that has proved a nightmare to successive governments, including the Socialist regime of Ramsay MacDonald.

The acts which authorize the giving of state aid to unemployed workmen will expire next June, but it is hoped that the committee's report will be ready long before then. The inquiry will be a complete one, and will be conducted with special attention to methods of administration, which in many districts are so poor that capable workmen never seek employment, and can live in comparative ease upon dole from the taxpayers' funds.

## New Pulp Mill

Construction Work Started For Manitoba Pulp and Paper Company

Work is now under way on the 500-ton pulp and paper mill being erected by the Manitoba Pulp and Paper Company, Limited, according to Col. H. C. I. Jones, vice-president of the Manitoba River Pulp and Paper Company, which is behind the venture. The mill, when completed, will be very similar to the one now owned by the latter company at Espanola, Ontario, and the construction conditions on the two sites are also alike.

## A Problem

Silas—"Old man Hickey looks worried."

Hiram—"Yes, he's tryin' to think of a way to move his city property out here in the country. He says it would make a nice business for him."

Silas—"What did he buy in the city?"

Hiram—"The Brooklyn bridge."

Mrs. Gableigh (at the shore)—I often wonder what the wild waves are saying.

Hubbard—Nothing, Maria. They are like some people I know: they make a great deal of noise but they don't say anything.
